Patient Information

Name: varsha s panicker

Age: 21.0

Gender: female

Overall Health Score

Score: 25%

Parameter Overview

Parameter	Value	Status
total_cholesterol	230.0	HIGH
hemoglobin	11.2	LOW
tsh	5.2	HIGH
hba1c	6.8	HIGH
creatinine	1.1	NORMAL
triglycerides	210.0	HIGH
ldl_cholesterol	170.0	HIGH
hdl_cholesterol	38.0	LOW
platelet_count	210000.0	NORMAL
urea	28.0	HIGH
fasting_plasma_glucose	140.0	HIGH
wbc_count	8500.0	NORMAL

Risk Severity Overview

Condition	Severity
Diabetes Risk	HIGH
Cardiovascular Risk	HIGH

Thyroid Dysfunction Risk	LOW
Anemia Risk	MEDIUM

Key Health Risks

Diabetes Risk: HIGH (Score: 64)

Cardiovascular Risk: HIGH (Score: 100)

Thyroid Dysfunction Risk: LOW (Score: 35)

Anemia Risk: MEDIUM (Score: 13)

Summary

- Your blood report analysis shows some important health observations:
- Total Cholesterol is higher than the normal range.
- Hemoglobin is lower than the normal range.
- Tsh is higher than the normal range.
- Hba1C is higher than the normal range.
- Triglycerides is higher than the normal range.
- Ldl Cholesterol is higher than the normal range.
- Hdl Cholesterol is lower than the normal range.
- Urea is higher than the normal range.
- Fasting Plasma Glucose is higher than the normal range.
-

Based on the above values, the following health risks are identified:

- Diabetes Risk (Severity: HIGH, Score: 64)
- Cardiovascular Risk (Severity: HIGH, Score: 100)
- Thyroid Dysfunction Risk (Severity: LOW, Score: 35)
- Anemia Risk (Severity: MEDIUM, Score: 13)
- Overall, some parameters are outside the normal range and require attention.

Recommendations

- Your diabetes risk is concerning for your age. Reduce sugar intake immediately and maintain an active lifestyle.
- Reduce oily foods, increase physical activity, and maintain a heart-healthy diet.
- Increase iron-rich foods like spinach and dates. Women are more prone to anemia, so regular monitoring is advised.
- Thyroid issues are common in females. Consult an endocrinologist and monitor hormone levels regularly.
- Consult a healthcare professional for a detailed evaluation and personalized treatment plan.
